

MISSION STATEMENT

The mission of Committee 210-Evaluation is to educate and familiarize owners, design professionals and contractors involved in the repair and restoration of reinforced concrete structures with the various evaluation methods with which to assess in-situ concrete conditions.

BENEFITS OF COMMITTEE MEMBERSHIP:

1. Learn about evaluation means and methods from other engineers, contractors and manufacturers.
2. Contribute your personal knowledge and experiences regarding concrete repair evaluation methods.
3. Widen your network of engineers, contractors and manufacturers in your field of expertise and in other disciplines.
4. Better understand the applicable evaluation methods for given concrete repair projects.

WHAT WE DO:

1. Disseminate knowledge about the various methods used by testing and inspection professionals through guidelines, webinars, articles and training.
2. Develop guidelines and procedures to obtain reliable field information through various methods of evaluation in order to facilitate mitigation and repair procedures.

GOALS/DELIVERABLES

1. Rebar Cleanliness Level (RCL) samples (both physical samples & a digital application) with an accompanying document describing the various conditions.
2. Develop a webinar on the evaluation of waterproofed plaza/deck slabs.
