

MISSION STATEMENT

To create and maintain guides, specifications, inspection, training, and testing programs to improve the build skills, performance, quality, and longevity of concrete strengthening solutions.

BENEFITS OF COMMITTEE MEMBERSHIP:

By participating in the ICRI 330 Committee you will support the industry by providing input and creating quality guidelines and documents pertaining to methods and techniques for strengthening of concrete structures.

WHAT WE DO:

Project: FRP Inspector Certification—this project aims at developing a certification program that establishes the minimum requirements for training and procedures for inspection and quality control of externally applied fiber-reinforced polymer (FRP) composite systems used for repair and strengthening of concrete structures.

GOALS/DELIVERABLES

1. Promote the use of ICRI guides to improve the quality, performance, and durability of concrete strengthening solutions.
2. Encourage participation by concrete repair design professionals, contractors, and material suppliers.
3. Develop certification programs to improve the build skills and quality of concrete strengthening techniques.
4. Support the institute through the development of guides, standards, and educational programs.
