

MISSION STATEMENT

Educate and familiarize owners, design professionals and contractors involved in the repair and restoration of reinforced concrete and masonry structures with the effects caused by corrosion of embedded metals and countermeasures used to manage corrosion.

BENEFITS OF COMMITTEE MEMBERSHIP:

- Learn from other committee members and colleagues and share knowledge and experiences to help advance the expertise in our own practice.
- Recognition among peers for taking a leadership role in educating the community at large on corrosion of steel in concrete and disseminating this information among the concrete repair and restoration communities.

WHAT WE DO:

Meet in person during ICRI Conferences and through virtual meetings to advance the working documents and exchange information.

Disseminate up-to-date information and documents developed by the Committee to our local communities.

GOALS/DELIVERABLES

1. Develop and update Technical Guidelines and other documents related to corrosion of embedded metals in concrete and masonry structures.
2. Disseminate knowledge about the corrosion process and corrosion countermeasures through guidelines, webinars, articles and training.
3. Develop procedures to obtain reliable field information regarding corrosion assessments and installation of mitigation techniques.
